SUMMARY

M2 student in Artificial Intelligence, Data Science & Agentic AI at Université Paris Dauphine-PSL, I'm especially drawn to projects where AI becomes a real product: useful, reliable, and well integrated. My experiences have given me the opportunity to work on AI agents, RAG, LLMs, NLP, Machine Learning, and MLOps. I enjoy learning, experimenting, and understanding what actually works in practice. I am looking for a 6-month final-year internship starting in February 2027 in AI Engineering, Machine Learning, Data Science, or Agentic AI.

SKILLS

Generative & Agentic AI: LangGraph, RAG, LLM Serving, Hugging Face Transformers, Vector DB (Qdrant)
ML & Deep Learning: PyTorch, TensorFlow/Keras, Scikit-learn, XGBoost, CamemBERT, Computer Vision (OpenCV, MediaPipe)
Languages & Data: Python (FastAPI, Pandas, NumPy), R, SQL (MySQL, SQL Server)
MLOps & Tools: Docker, CI/CD (GitHub Actions), MLflow, Evidently, Git

PROFESSIONAL EXPERIENCE

Agentic AI Developer Intern – **ARSII** 07/2026 – 09/2026
Personal organization AI agent: KAIROS

- Designed a multi-tool AI agent (LangGraph), traced and evaluated with LangSmith: 87% accuracy on 60 test cases.
- Tested vLLM to serve an open-source LLM, then ran it locally with Ollama (1.6 s avg. latency), connected to Calendar and Gmail.

Stack: LangGraph • LangSmith • Tool calling • vLLM • Hugging Face • Ollama • FastAPI • React/TypeScript • Google Calendar/Gmail

R&D Intern: Cybersecurity, Automation & AI – **Tunis Stock Exchange** 01/2025 – 05/2025
Final-year project (PFE) – Copilot For Blue Team (highest final-year project grade in my class, 18.5/20)

- Designed a platform to support Blue Teams and automate their cybersecurity tasks (audits, network monitoring).
- AI analysis of security reports via Gemini API, recommendations, web dashboard and a portable version for constrained servers.

Stack: Flask • React.js • SQL Server • Gemini API • CIS Benchmarks • Active Directory • Bash/PowerShell • Nmap/Nuclei/Lynis • Kali Linux

Full-Stack Developer – **Synotec** 07/2024 – 08/2024
End-of-year project (PFA) – Web Developer: e-commerce website

- Built a complete e-commerce website with Django: product and user management, cart, orders, and authentication.

Stack: Django • React.js • MySQL

EDUCATION

Université Paris Dauphine-PSL: Master's in Artificial Intelligence, Systems, Data (IASD) 2025 – present
Key courses: Machine Learning, Deep Learning, NLP & LLMs, Agentic AI, MLOps, Data Mining, probabilistic models.

ISTIC: Bachelor's in Information and Communication Technologies – *Top graduate* 2022 – 2025
Key courses: Python/Java, SQL, TCP/IP networking, cybersecurity, cloud/Linux, Big Data, IoT, Huawei Datacom & CANN.

Additional training: Coursera – *MLOps and LLMOps in Production* (2026) • IBM/ISTIC – *Big Data* (2024)

PROJECTS

BreastFriend: AI Oncology Assistant – *Generative AI / RAG* - Hackathon 12/2024

- Built a hybrid RAG with reranking, evaluated with Ragas.
- Integrated emergency detection, patient-doctor follow-up and virtual try-on (computer vision); Business Impact Award winner.

Stack: Python • Flask • React • Qdrant • Ollama • Ragas • MediaPipe • OpenCV • Docker

Analysis of Food Price Pressure in Tunisia: *NLP & Fine-Tuning* 05/2026

- Fine-tuned CamemBERT on citizen comments: $R^2 = 0.78$ vs. 0.24 for the best tabular model.
- Compared classical models, PCA, and MLP, then mapped price pressure by governorate.

Stack: Python • CamemBERT • Hugging Face Transformers • PyTorch • XGBoost • TensorFlow/Keras • GeoPandas • Folium

AI Platform for Breast Cancer Prediction: *ML & MLOps* 05/2026

- Set up a complete MLOps pipeline with MLflow: experiment tracking, data drift detection, containerization, and CI/CD.
- Compared 6 ML models and deployed the best one (KNN, F1-score 0.80) in a web application.

Stack: Python • Scikit-learn • MLflow • Evidently • Docker • GitHub Actions • Streamlit

Other projects: Kaggle House Prices: top 1.1% (XGBoost, Random Forest) • **Bank fraud detection** (Bayesian network, pyAgrum) • **Hotel revenue prediction** (Scikit-learn, SMOTE, SHAP) • **PRIMIA**: AI for credit insurance (EY Hackathon)

EXTRACURRICULAR ACTIVITIES

DataIn: IT & Training Lead *(co-organized the Dauphine & EY Hackathon, Python trainer)* 2025 – present
Maker Labs Robotics ISTIC: Media Lead *(co-organized the ISTIC ROBOTS national competition)* 2023 – 2025

LANGUAGES & INTERESTS

Languages: • English (fluent) • French (fluent) • Arabic (native) • German (beginner)
Interests: organizing music festivals • gymnastics, running, swimming
